The Suggestions of The News

Aprroved. The Elizabethtown News says:

The News is in receipt of letters and personal messages from various parts of Kentucky heartily endorsing its recent editorial suggestling the way to solve our tax problems in Kentucky. There ls a most universal agreement as to one of the suggestions contained in the edi torial columns of the News, to wit: Providing for a State commission, with entire control over the matter of assessment. There is also practically a unanimous opinion, from those who have written us on the subject, that at present the real and personal property of 11:30 a. m - "Mountain Prints," Miss the State is not assessed at more than 35 per cent. of its cash value. Good Suggestion.

Say! farmers, you who know that corn is high, and hogs comparatively low, let us tell you something. If you run out of meat before hog killing time have you noticed the exorbitant price you must pay for bacon at the grocery or butcher shop? Did you ever know a time, when country hams, shoulders, local grocer at good prices? If you have a farm and hogs you certainly have a more meat? If you have more than you can use, you can sell it readily, at any time, at prices that will pay you far bet ter than to sell live porkers to the packers. Isn't this true?-Shelbyville Record.

A Gift for Climax Readers

The Climax has arranged with one of the largest Magazine and Newspaper Agencies of New York to get at REDUCED RATES any newspaper, magazine or periodical that is published-Political, Scientific, Literary, Musical, Farm Papers, in fact anything. We get everything (with possibly a few exceptions) at less than publishers prices. In connection with The Climax we propose to give them at actual cost to us to subscribers of The Climax only. This saves you some money-from 10 to 50 per cent-besides the trouble and expense of ordering.

Consult us by mail, or telephone 69, or we prefer you should come to our office and talk it over before you place your order. This is a reading age. Madison county people are a reading people. Everybody reads. Not a family in the county but what should take advantage of our proposition. TRY IT ONE YEAR. Remember if one member of the family is a subscriber to The Climax every member of the family is entitled to the benefits of our offer.

This offer is good at any time so if your subscription to any paper or magazine you are now taking has not expired, come and see us when it does expire before you renew.

KEEPING EWES' FLEECE DRY

Of Great importance That Sheep Be Protected From Winter Rains-Sait and Water Essential.

The protection of breeding ewes from failing snow is important, especially is it important when it fails in the form of rain. Winter rains and also sleet are always cold. If sheep of the open-wooled breed are long exposed to these they may do great harm. The closed-wool breed as the merinos, will be harmed much iess, as the water cannot readily enter the wool that they carry. The shelter provided up to the lambing season may be of the simplest kind, providing it will protect from storms and rains

The alm should be to give the breeding ewes large liberty in winter, if the ground is bare, or even partially, for it will do them good to give them large ilberty. They will make excursions to the fields in search of grass, and the exercise will do them much good. They should be allowed to lie in a well bedded yard at night. in a shed or house adjoining, as they

TO THE TOBACCO GROWERS OF MADISON AND ADJOINING COUNTIES:

We have sold over our floors thus far over three-quarters of a million pounds of the new crop Burley tobacco and while we have not reached the extreme top notch price for separate baskets, we have had a better general average than we had last year. We have every reason to believe that after the holidays an active market with strong to increasing prices may be

The following are some of our best prices; Coy & Curtis, general av. erage \$18 00; Coy and Prewitt, average \$18.00; Ellswick & Curtis, average \$20 25, one basket brought \$46; Forrest Calico, average \$17.75; Jerry Noland, average \$18.00.

We have never made statements to mislead anyone, make no claims but those founded on facts. We wish again to repeat: First, that we give every seller an absolutely square deal whether

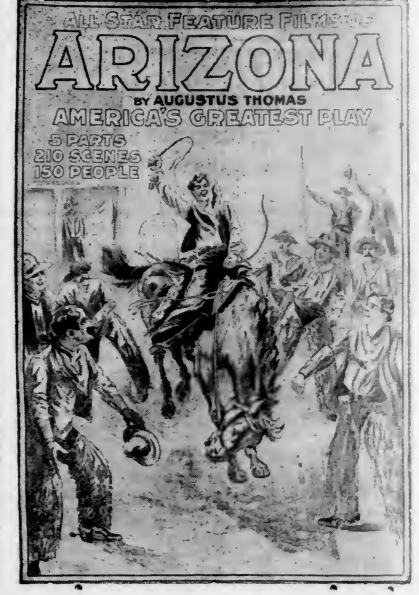

he sells thousands of pounds or hundreds of pounds. Second, that we can, and do, get just as much for your tobacco as any house in the world for same grades.

Third, that we have plenty of room for you and your teams. Fourth, that we have an up to date commodious warehouse with every known facility for handling tobacco.

Our two houses are connected by a vladuct, the old house being used as a prizing plant where several of the largest buyers prize all tobacco purchased in this market. We have had four years experience in the loose leaf tobacco business which is worth a good deal to you but costs you not a penny. We urge you if you have neve never sold with us to ask any one who has, if our treatment does not warrant every claim we make and we ask you to compare our prices with those of any other house in the country. If our claims are true, just get in line with the crowd and bring your tobacco to us. December 19, will be our last sale before the holldays but tobacco will be received at any time and sales will be re-

The five houses of the Lexington Tobacco Warehouse Co., Incorporated, have saved their eustomers the past week about one half their selling charges on their tobacco

The Lexington market sold last week 3,104,935 pounds at a general average of \$12.42 per hundred pounds. Our five house sold 1,018,470 pounds of this amount at a general average of \$12.60 per hundred pounds, making a net gain for our customers of 18 cents per hundred pounds. This provs to the tobacco raisers what it means for them to let experienced tobacco men sell their tobacco for them. The following crops will give you an idea of some of the averages made the past week:

Yarrington &Scythe, Fayette county, 1,915 pounds, average \$18.75; Showalter & Burk. Scott county, 8,515 pounds, average \$17.31; Reeves & McCoy, & arrard county, 3,580 pounds, average \$16 48; Onstott & Simpson, Garrard county, 4,700 pounds, average \$16 90; Mattingly & Carter, Jessamine county, 3:300 pounds at \$16 00; Prewitt & Kelley, Madison county, 2.095 pounds, average \$15.75; John D. Simpson, Madison county, 2,450 pounds, average \$15.21.

The market closed for the holidays on Friday, December 19, and will open again on Monday, December 29, and we expect heavier sales from now on. All of our houses are open every day, both day and night, ready to receive your tobacco. It means just as much to us as it does to you to get you high prices for your tobacco, for we want to send hou home a satisfied eustomer. Bring your tobacco in during Christmas week, so you ean have it on sale the opening day.

A Classic From Woodrow Wilson.

Woodrow Wilson's reply to a body of suffragists who urged that he recommend women's suffrage to Congress, was a classic, botn in thought and expression.

"Whenever I walk abroad I realize I am not a free man, I am under arrest. l am so carefully and admirably guarded that I have not even the privilege of typical of my present transference from any and every subject to being an official of a great government, and, incidentally mal in this country. Time Will Tell.

A few days ago an Eastern man wrote a friend in Washington and asked him whether he thought the Wilson adminstration a success. The friend replied: "It is too early to say as yet whether the administration has succeeded. But Wilion is a success."

He then explained that President Wilson is succeeding in donig the things he promised to do, and added: "Whether the administration is a success, however, depends upon whether the Democratic phhlosophy is economically correct The people took the party at its word. Wilson is carrying out the pledge consistently. The character of Mr. Wilson himself gives the greatest hope to his friends that he will prove to be right. But time will prove that."

There is no denying that the President has won the country by his sincerity in doing what he promised to do and accept the full responsibility the people placed on him: hence personally he has suc ceeded. The big questions to come up during the next three years are ques; tions about which even big men differ. if the Democratic attitude on these questions proves to be correct by actual application, the Democratic administratlon will have been justified. If the Democrats are proved to be wrong in their economic policies, then, of course, President Wilson's fine character, hon esty and great ability will not save the administration .- Paducah News-Democrat.

Animal Should Be Carefully Watched and Fed on Slop Ration-Supply Fresh, Dry, Clean Bedding.

A few days before farrowing the sow should be placed in a clean, roomy pen in the central hog house or in a special portable house

When the udder of the sow becomes distended and milk can be drawn from the tests she may be expected to farrow in 24 hours. She should then be closely watched and fed a slop ration rather than a dry feed, to keep her bowels open. She should have a medium supply of fresh, dry, clean, dustless bedding. Bariey straw or wood shavings should be avoided.

Little pigs are very sensitive to cold and if they arrive during cold weather they must be given special attention. if a litter is farrowed in a small portable house the air may be considerably warmed by hanging a lantern from the ceiling, and doors will add greatly to the comfort of the animals.

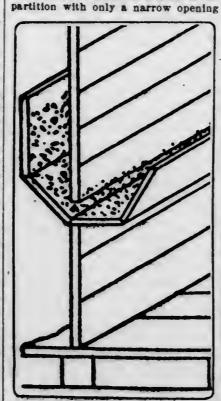

In a large hog house it is best practice to put the little pigs as soon as walking the streets. That is, as it were, farrowed into a tight wooden box with clean straw and cover the box with a being an individual, with his mind on blanket. The pigs will nestle together and keep themselves warm. Should the weather be extremely cold hot bricks may be put in the bottom of the box and covered with an old blanket with dry straw on top for the pigs "I set myself this very strict rule when to rest in. Grain is thus fed more economically and to greater advantage, as it cannot be boited quickly by the hungry or over eager horse. A slide on the outside can easily be arranged to regulate the size of the opening through which the grain passes to the inner

TREATMENT FOR LUMPY JAW

Removal of Growth While in Tissuea by Use of Knife is Considered Satisfactory Method.

The most satisfactory way of treating lumpy jaw is to remove the growth with a knife when in the tissues only. The animal is thrown the skin is cut over the tumor, and the sweiling removed by cutting around it in the healthy tissues. If hemorrhage is large the vessel may be tied or taken up with the forceps; bleeding from smaller vessels may be seared with a red-hot iron.

The wound should be washed with an antiseptic in one per cent. solution after the tumor is removed, and then packed with antiseptic gause or cotton, and the wound stitched The next day remove the stitches and treat as an open wound

Segregate Cattle and Horses Cattle and horses should not run ogether and be shut in the same small corral together. It may be all right to pasture them together, but in the corral, particularly during the cold weather, one is liable to hurt the other. Horses will run the cattle and cattle may hook the horsea.

never can run smooth. If it did it would not be true love. The single certain sine qua non of true love is that it shall not run smooth. For such is the constitution of human nature.

When people set out to be friendly and ongenial they can succeed only by keeping up a gentle hostility. Consider the average evening call. How tiresome it is until some one starts an argument, or a game of cards is proposed. That accounts for the popularity of games. They furnish a sham and innocuous hostility without which society with one's fellows is deadly. Men and women can be happy together for days at a time if they are contending at golf at tennis, at cards or

at other games. People who can sit around drawing rooms or verandas or clubs for any great ength of time and chat agreeably are degenerate, They have lost their spirit and might as well be dead .- Lippincott.

Uncle Sam's Farms.

The opening of the Fort Peck indian Reservation recently was called one of the last great drawings of land Uncle Sam can hold; he is not nearly at the end of his spare land, however.

There remains 682,000,000 acres of public fands. More than half these are n Alaska, but there is in the old United States enough land to make ten States the size of New York.

Rather more than enough land to make a Connecticut, Massachusetts and Rhode Island was patented in the fiscal year of 1911-12.

The remaining land if it were ali available, would support a sparse grain growing population of 15,000,000, not counting some millions more in the cities created thereby; or a denser farming population of 60,000,000.

Of course, it is not all available. Much of the land will apparently always remain worthless. Much can be made useful by drainage, dry-farming, terracng or irrigation. The proportion of land so reclaimed will depend upon economic conditions and the pressure of population. But there is certainly room for some millions more of farming population upon public lands.

Some weeks ago we noticed an account a delightful day which the city of Bowling Green had given the rural dwellers of Warren county. The tillers of the soil were invited guests of the city and were given the best of entertalnment and made to feel welcome and at home. Just the other day, our neighbor city of Lancaster did herself proud in arranging a "big day" for the farmers of Gar rard county, and that town will not stop with one day, but is arranging others equally as entertaining. It is a move ment to be applauded and one which will be far-reaching ln its results.
